

## VanEck UCITS ETFs

Providing investors access to opportunities that will strengthen their portfolios is VanEck’s guiding principle. Through forward-looking, intelligently designed active and passive approaches, we offer value-added exposures to emerging industries, asset classes, and markets as well as differentiated approaches to traditional strategies.

We think beyond the capital markets to identify the trends—including economic, technological, political and social—that we believe will fuel investable opportunities and inspire our clients to reach their financial goals.

VanEck was one of the first U.S. asset managers to offer investors access to international markets and recognized early the transformative potential of gold investing, emerging markets and ETFs. Today, our firm’s capabilities range from core investment opportunities to more specialized exposures to enhance portfolio diversification.

Today, VanEck manages \$95bn assets for its clients over several asset classes and styles.
