Securities custody account

Wealth management easily implemented

Securities custody account for global stock exchange transactions

The securities custody account offers a customized solution for asset management and ensures reliable processing of all stock exchange transactions - worldwide, with access to the major stock exchanges.

With the powerful e-banking system, a rapid execution of securities transactions is guaranteed.

The e-banking at bank zweiplus is equipped with a special search function that enables a simple search using a variety of criteria such as custody account number, name or performance. The customer base can also be divided into static or dynamic groups according to any criteria. Analysis functions also allow the display of customer data using various criteria such as by assets under management or asset classes, supporting the asset manager in the optimal care of his customers.

New: paperless account/custody account opening with digital signature.
