

Bonafide Wealth Management AG

ocean of opportunities

Bonafide is an asset manager that focuses exclusively on sustainable companies in the fish & seafood sector and their entire value chain. Our Team is dedicated to explore the blue revolution and the opportunities associated with it. Our common goal is to help feed the world and ensure food security while achieving attractive financial returns.

The Potential of the Ocean

The report «The State of World Fisheries and Aquaculture 2022» shows that humankind has never consumed so much fish and has never been as dependent on this sector for its wellbeing.

- The global population had already exceeded 8 billion people in 2022 and it's expected to hit 9.8 billion by 2050.
- More than 3.1 billion people eat fish at least once a week.
- The diets of people in the industrialised countries are changing towards the consumption of healthy proteins.
- Urbanisation and real disposable income are on the rise.
- The growing demand for fish as a resource creates an attractive environment for investors.
- Smallest environmental footprint relative to the rest of the animal protein sources.
- The fish & seafood sector was only recently discovered by large financial institutions (first movers).

Bonafide offers a unique opportunity to participate in the growth market for fish and seafood.

Sustainability

- Small ecological footprint
- Absorption of CO₂ by algae and aquatic plants
- Contribution to the achievement of the Sustainable Development Goals
