[+] How to obtain an ActivCard number

Passcode **2**

Token serial number (S/N) XXX

In order to protect you against possible misuse of your personal data by means of "phishing", please compare the ActivCard S/N number displayed with the number on the back of your ActivCard.

Restart login Next

- Your ActivCard is the third security element of the identification and authentication.
- Press «OK»-Button **1** your ActivCard display shows «ENTER PIN».
- Enter your pin and confirm by pressing the "ok" button. Your ActivCard displays an 8 digit code.
- Enter the 8 digit code in the «Passcode» field **2** and click "next" to enter your e-banking

Please note:

If your ActivCard displays „locked“ or you are not able to login for any other reason please call our Service Line

ActivCard – Change of ActivCard PIN code

1. Press the «OK» button.
The display reads «ENTER PIN».
2. Key in your ActivCard PIN code and press the «OK» button.
The ActivCard number is displayed.
3. Press the «MENU» button.
The display reads «CHANGE PIN».
4. Press the «OK» button.
The display reads «NEW PIN».
5. Enter a new PIN code (4 digits) and press the «OK» button.
The display reads «CONFIRM».
Note: For improved security, you cannot use a weak PIN code – one where the distance between subsequent digits is a constant value. For example, 0000, 1234, and 9753 are weak PIN codes while 1243, 1256, and 9371 are strong and therefore authorized PIN codes.
6. Enter the new PIN code again and press the «OK» button.
The display reads «COMPLETE».
Your PIN code has now been changed.

Other functions of the ActivCard

Other functions of the ActivCard may be accessed by pressing the «MENU» button several times:

- «VIEW SN» Display of the serial number of your ActivCard
- «VIEW CLOCK» Display of the serialized time of your ActivCard
- «VIEW COUNT» Display of the value of the authentication counter
- «INIT KEYS» Manual alteration of the configuration or re-initialization of the security keys stored in the ActivCard.

These functions are required for the re-synchronization or re-initialization of your ActivCard. You should not use these functions, particularly the latter one.
